**Hawk & Little "Battle Carbine"**

**Installation:**

- Download Equinox407's MK18 Mod
- Put all files into your patchday8ng file in mods\update\x64\dlcpacks\pachday8ng \models\cdmages\weapons.rpf
(This folder won't be in the game by default I believe, but it is part of the OIV in the VF semi auto pistol mod.)
- Install these textures.
- Put textures in patchday8ng. (same folder you put the models)
